

## GIT cmds steps

To create NEW repository in github using cmd

```
gh repo create my-project
```

if gh not found, then install using below cmd.

```
winget install --id GitHub.cli then,
```

this command will create new repository in github (web application)

after creating new repo , to push the files in github but note that directory should not be empty

```
mkdir my-project
```

```
cd my-project
```

```
git init
```

```
echo "# My Project" > README.md
```

```
git add .
```

```
git commit -m "Initial commit"
```

```
git branch -M main
```

```
git remote add origin https://github.com/your-username/my-project.git
```

```
git push -u origin main
```
